

**This patient had a few concerns. The first being an uneven profile with a small lowerlip.**

**profile before**

**profile after**

**note a more balanced upper and lower lip**

**before after**

**she was concerned about the lack of fullness in her lips when she smiled which is much more evident in profile**

**48 hrs after**

**Full, beautiful and natural looking**

**relaxed before**

**patient did not like "loosing her upper lip" when smiling**

**immediately after procedure**

**some swelling is normal after the procedure**
